

Klamath County Fire District 4

Entry Level Firefighter Unit 10- Scene Illumination

Individual Performance Standards

9.2	SCENE ILLUMINATION
------------	---------------------------

The above Performance Standards must be completed in the presence of a Firefighter 1. Documentation should include the date and initials of the observer, and if appropriate, the time to took to perform the task.

SCENE ILLUMINATION – 9.2

Fire Individual Performance Standard

OBJECTIVE: Locate, and deploy portable lights and power supply so as to properly illuminate the fireground.

EQUIPMENT: Response apparatus, power supply such as generator, power cords, portable scene lights and structure fire PPE.

NARRATIVE: You have been given the task of illuminating the fireground. You must start the power supply and run the power cords to portable lights. Then you must place the lights so they properly illuminate the scene without creating a hazard.

STANDARD: You must safely distribute a portable power network to properly illuminate the fireground with 100% accuracy.

TASKS	Done	Not Done
1. Lift and move equipment safely.		
2. Locate power plant in a remote and well-vented location.		
3. Arrange power cords neatly to minimize trip hazards.		
4. Organize lights in a useful position to illuminate the area sufficiently.		
5. Start power plant.		
6. Plug cords into power unit or junction box and furnish illumination.		
7. Shut down equipment when told to do so.		
8. Allow equipment to cool before returning to service or verbally explain the need to do so.		
9. Clean equipment, check oil, and refuel power plant or verbally explain the need to do so.
